HW Group - IP Water Leak Detector

HWg-WLD is a network-enabled water leak detector with a water-absorbing sensing cable. HWg-WLD features a built-in web server, SNMP support, and **e-mail alert in case of water flooding**. It can remotely control a relay output over the network (a relay is switched when a water leak is detected along the sensing cable). HWg-WLD detects water leaks or water floods along the entire length of the sensing cable. The sensing cable detects even the smallest volume of water, ethylene glycol, or other conductive liquid.

Conel - UR5i UMTS/HSUPA Router

The UMTS/HSUPA router UR5i interconnects a large variety of equipments with interface Ethernet 10/100 into internet or intranet. Due to high speed data transfer of max. **7,2 Mbit/s** (download) and upload max. **2 Mbit/s**, this device is ideal for wireless camera connection (security cameras, traffic monitoring cameras etc.), connection of individual computers or complete LAN networks, bank machines (ATM) etc. It is equipped, in standard execution, of 1 Ethernet port, 2 USB port (s) and **2 SIM card slots**. Available in metal case version suitable for DIN rail mount.
